

Dear Cifarx Hiring Team

I am writing to express my keen interest in the PHP Backend Developer (Remote) position at Cifarx. With over two years of professional experience in backend development, particularly using PHP and the Laravel framework, I am confident in my ability to contribute meaningfully to your development team and deliver scalable, high-performance backend solutions.

Throughout my career, I have worked extensively on developing and maintaining robust APIs and backend services. I follow clean coding practices and always aim for maintainability, performance, and security. My work style is rooted in agile methodologies, and I am comfortable participating in sprint planning, daily stand-ups, and retrospectives. I thrive in collaborative environments and value clear, respectful communication with product managers, designers, and fellow engineers.

While PHP (Laravel) is my core strength, I also have a proactive mindset and am open to learning and working with Python when needed. My understanding of software design patterns, relational databases, and basic DevOps practices (like version control, and server configuration) equips me to be a well-rounded team contributor.

What excites me about Cifarx is your emphasis on growth, flexibility, and real collaboration. The opportunity to work remotely while staying connected to a forward-thinking team based in Bangladesh is exactly what I'm looking for. I am enthusiastic about bringing my experience, energy, and problem-solving skills to a team that values continuous learning and technological excellence.

Please find my resume attached for your review. I would be delighted to further discuss how I can support your backend development efforts and contribute to the success of Cifarx.

25 May 2025

Best regards,

Md. Helal Uddin,

Full-Stack Web-Developer.
